### From the Founder's Desk – Smita Mehra Sharma

At Genius, we believe learning should go beyond memorizing formulas. Abacus and Vedic Maths are powerful tools that strengthen focus, enhance memory, and train the brain to think logically. More importantly, they cultivate the habit of critical thinking – a skill every child needs to thrive in today's world of rapid change.

We take pride in guiding our students to see numbers not as obstacles, but as opportunities to sharpen the mind, build confidence, and face real-life challenges with clarity and creativity.

**"Education is not the learning of facts, but the training of the mind to think."**

### FRANCHISE INTRODUCTION

### Graduate Testimony

**CAYDEN FUNG**

I have been doing abacus for over 4 years now. Abacus has helped me through math problems like addition and multiplication. I have achieved better results for maths thanks to Smita. I'll like to thank my parents and Smita for encouraging me to do my best in abacus. It felt like yesterday where I was a new kid doing maths to a kid graduating from abacus. My time in abacus was great with making new friends and learning new methods.
