From the Founder's Desk – Smita Mehra Sharma

At Genius, we believe that learning must reach far beyond memorising formulas. Abacus and Vedic Maths are not merely calculation tools – they strengthen focus, boost memory, and train the mind to think with clarity and logic.

Most importantly, they build the habit of critical thinking – a foundation every child needs to grow, adapt and succeed in a world that is constantly evolving.

We are proud to guide our learners to see numbers not as hurdles, but as possibilities – opportunities to sharpen their intellect, gain confidence, and approach real-life challenges with creativity and calm understanding.

"We don't just teach math – we awaken mental power."

FRANCHISE INTRODUCTION

A website designer, photographer, passionate teacher, and proud mum of two. My journey with teaching and learning began early. At just 12 years old, I found joy in helping younger students- aged 10 and 11- grasp difficult concepts with ease.

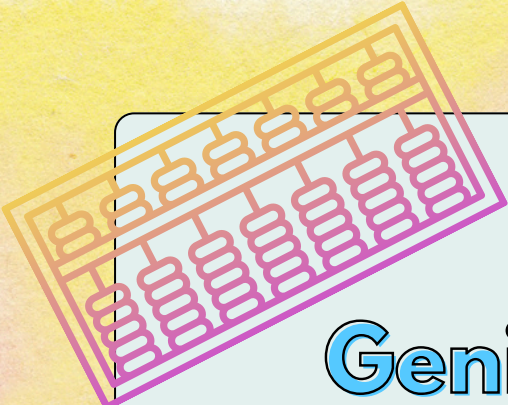

Today, while I wear many hats professionally, the teacher in me is always present- curious, creative, and committed to making learning enjoyable and accessible.

Neuro Nuggets Brain Facts for Kids

- 🧠 Your brain has 2 halves – left = logic... right = creativity
 - ⚡ Your brain sends messages faster than a racing car (up to 400 km per hour!)
 - 📖 Doing mental maths = brain gym workout (just like exercise for muscles!)
 - ★ When you imagine abacus beads, your brain uses pictures + logic together
 - 🔄 Practising daily builds stronger brain connections – like new roads in your mind
 - 😊 Kids who keep their brain active remember better, think faster & stay more confident!
 - 🌱 Solving puzzles trains the brain to spot patterns instantly
 - 💡 Brain loves challenges – it becomes stronger every time we try something new
- So... feed your brain every day –
Learn. Think. Play.

👉 **At Genius Abacus, we help your brain become sharper, quicker & smarter!**

Genius Tips for Parents

Use real-life examples like shopping & bills for math 🛒📄

Set tiny daily goals (2 mins sums) 🕒

Ask children to explain their steps – it builds clarity 🧠🧩

Limit screen time before study – brain focuses better 📵🌟

Celebrate tiny improvements – progress matters! 🎉👏

Genius Reward & Recognition

NSW Parliament Recognition

Local Business Awards Finalist

Business CHAMPIONS Award Finalist

World Malayalee Council Award

Leadership & Innovation Award

Artisan Award

Parent's Review

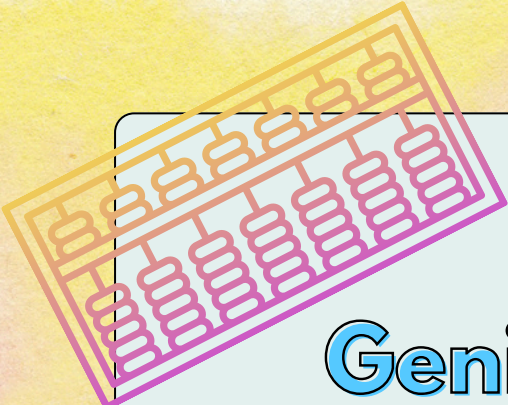

Smita is an exceptional, caring and nurturing teacher. She is extremely patient and fosters the love of maths within each child. My son's mental maths ability has grown from strength to strength and I can not be more grateful for Smita's amazing mentoring skills. With her guidance, abacus has helped my son dramatically work out maths problems with precision, speed and accuracy. Thank you and will highly recommend.

Vedic Mathematics Fact

Maths magic happens when patterns replace panic!
"Vedic Maths turns calculation into logic play – the more you explore patterns, the more fun math becomes!" 12

Graduate Testimony

PALASH PARIKH

I started Genius Abacus as a beginner, but year by year I grew sharper and more confident. Abacus helped me in school, competitions, Olympiads and even real-life maths like percentages and money. With mental abacus and IXI, I could solve questions much faster and with great accuracy. Smita Ma'am always guided me patiently, understood my strengths and helped me improve.

Today I can proudly say – Abacus made me quick, smart and confident.

Thank you Smita Ma'am and Genius Abacus for this journey! 🙏📊🌟

Where Numbers Become a Story...

Every child carries a silent library inside their mind.

Some pages are made of pictures... some are made of questions... and some are made of numbers.

Abacus and Vedic Maths turn numbers into imagination.

When a child shifts a bead...

it isn't just a calculation – it's a picture forming in the mind.

When they try a Vedic shortcut...it isn't just a trick – it's a pattern revealing itself like magic.

Slowly, math stops being fear... and becomes curiosity.

Numbers become like characters in a book –

each digit with a purpose, each pattern with a hidden idea.

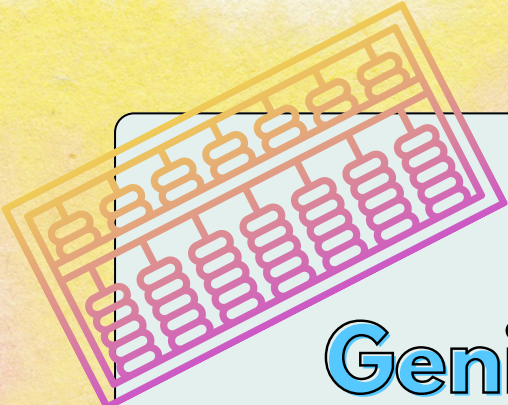

And that is where the real transformation begins: confidence grows, focus sharpens and ideas flow faster.

Abacus and Vedic Maths don't just make kids quick in calculations –they make them think.

They learn to solve real-life challenges with clarity, calmness and creativity.

Because inside every number...there is a story waiting to be discovered.
