Smita Mehra Sharma
Founder Director

At Genius Abacus, we believe every child has the potential to grow into a confident and brilliant learner. Our mission is to make mathematics joyful while strengthening focus, memory, and problem-solving skills. What began as a small initiative has grown into a vibrant community of students, parents, and educators working together to nurture young minds.

Thank you for being a part of the Genius family.

"Every child carries a spark of genius—we simply help it shine." ✨

A New Beginning

We were delighted to launch our **new Genius Abacus franchise in Toongabbie.**

We also started **new Abacus classes at Metella Road Public School**, bringing our program closer to young learners.

This milestone reflected the growing trust of our parent community.

Together, we continued our mission of nurturing confident and brilliant young minds. ✨

Math to Money: Building Financial Skills in Young Minds

Learning math through Abacus not only improves calculation skills but also helps children understand numbers in everyday life. Mental math enables them to grasp simple concepts like prices, savings, and budgeting. By strengthening number sense, Abacus builds confidence and helps children develop smart money habits for the future.

✨ Today's number skills can become tomorrow's financial wisdom.

Upcoming Events & Programs Calendar

Here is the schedule of our upcoming events and activities. We warmly encourage all students to participate and showcase their skills and enthusiasm.

JUNE 14 Annual Competition

Our Annual Competition will give students the opportunity to showcase their speed, accuracy, and mental math abilities. It encourages healthy competition while celebrating the progress and dedication of our young learners. Students will gain confidence as they challenge themselves and strive for excellence.

✨ "Excellence is not being the best; it is doing your best every time."

JUNE 21 Annual Showcase Event

The Annual Showcase Event will celebrate the talents, confidence, and achievements of our students through engaging presentations and activities. It will be a proud moment for children to demonstrate their learning journey to parents and the community. The event also highlights the spirit of teamwork and creativity within the Genius family.

✨ "Every child has a spark of genius waiting to shine."

Stay tuned to our website and social media channels for the latest updates and announcements about these exciting events. ✨

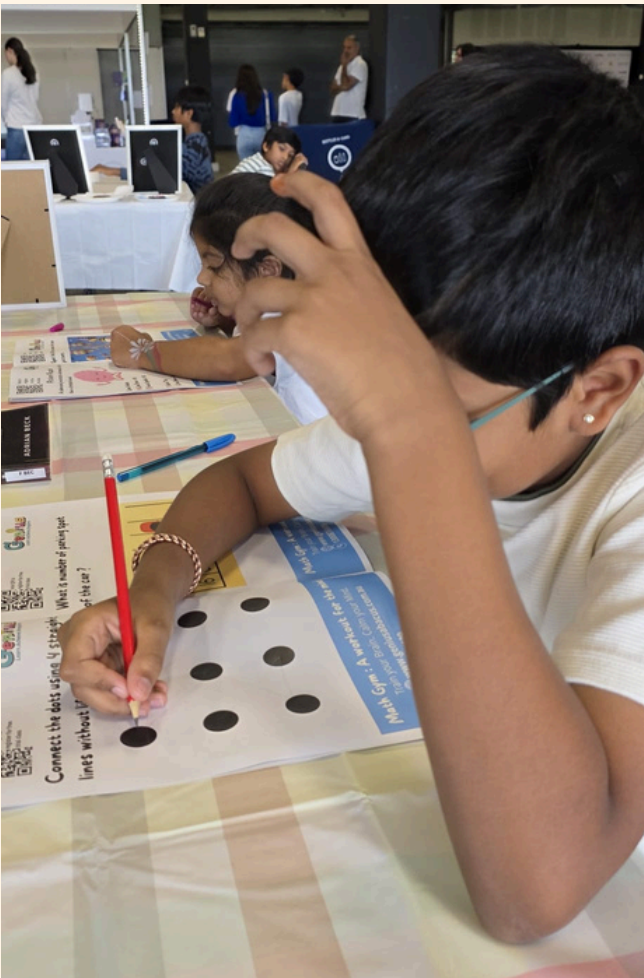

◆ Math as Therapy: Calming the Mind Through Numbers ◆

Mathematics can be more than just a subject—it can also be therapeutic. Solving math problems requires focus and logical thinking, which helps the mind relax and stay present. Activities like Abacus and mental math encourage concentration and reduce distractions, creating a calming effect similar to mindfulness exercises. For children, practicing math regularly builds patience, confidence, and a sense of achievement. Each solved problem brings satisfaction and motivates them to keep learning.

In many ways, numbers help train the mind to stay calm, focused, and resilient.

✨ Sometimes, the quiet rhythm of numbers can be the best therapy for the mind.

Maths Gym at the Mindful Living Expo

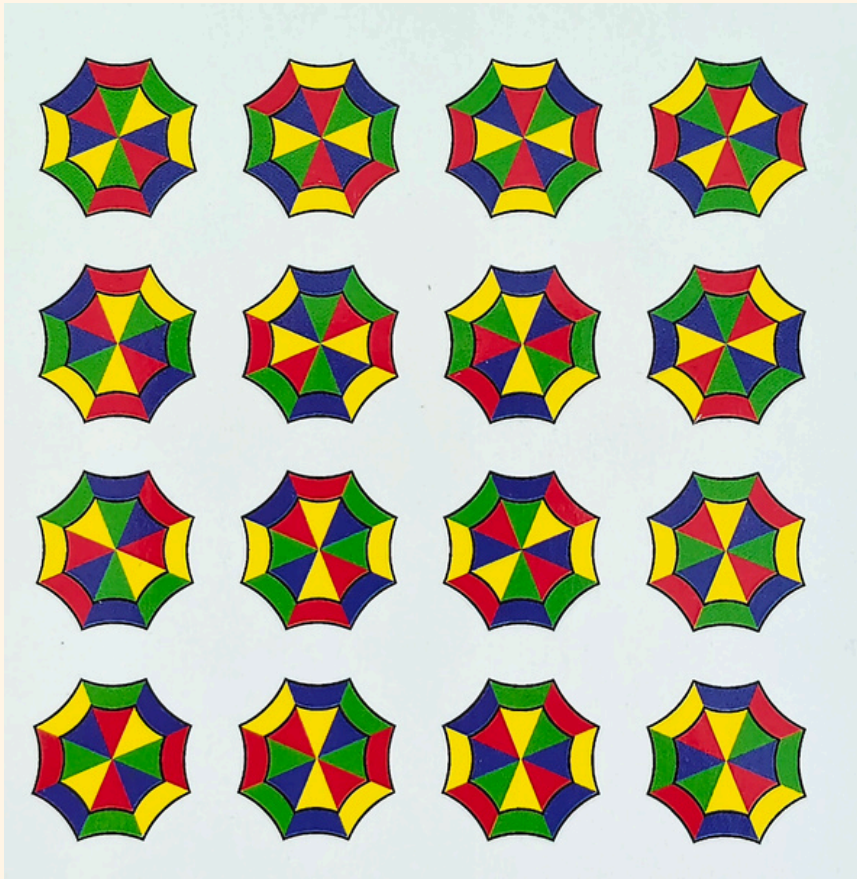

On 14-15 February, Genius Abacus proudly participated in the Mindful Living Expo at Rosehill Racecourse, where we introduced our unique Maths Gym - a workout for the brain. Just like physical exercise strengthens the body, Maths Gym activities are designed to strengthen the mind through engaging number-based challenges.

Children participated in exciting exercises that improved focus, memory, speed, and confidence, all while having fun. The sessions were designed for different age groups and included interactive activities, quick calculations, and brain-boosting games.

The lively BINGO session added extra excitement and brought smiles to everyone present. It was a wonderful opportunity to show families how learning math can be energetic, enjoyable, and empowering.

✨ A strong mind grows when numbers become a joyful challenge.

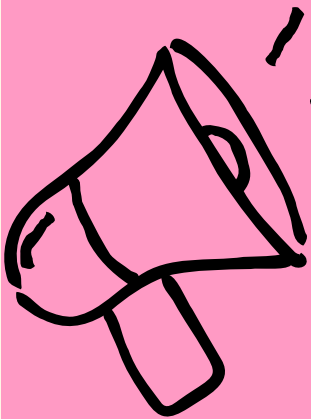

Try this with your child

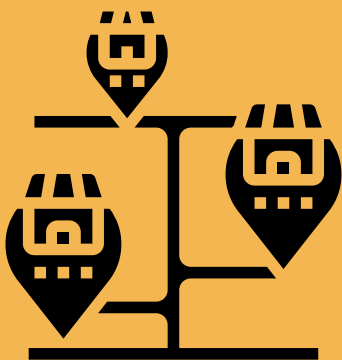

Genius Puzzle Corner ★

Can you find two identical figures among the sixteen shown in the illustration? The figures can be rotated about their centre and cannot be mirrored.

Exhibitor Alert!

Genius Abacus will be an exhibitor at the Sydney Education Expo on 29 March 2026 at Castle Hill RSL, from 10:00 AM to 4:00 PM. Come visit us to explore how our Abacus programs help children build strong mental math, focus, and confidence.
